Portfolio: https://sohaibmokhliss.github.io

PROFESSIONAL SUMMARY

Computer Science & Networks Engineer (EMSI, 2026) and Specialized Technician in Cybersecurity (ISTA, 2022), with banking-sector experience at BMCE, CIH and HPS. Coming from a penetration testing background, I combine security discipline, DevOps automation and business understanding to design reliable platforms, industrialize deployments and improve service observability. Available immediately for a pre-hire internship or a full-time position.

TECHNICAL SKILLS

CI/CD: Jenkins, GitHub Actions, Ansible, Rancher, Nexus, SonarQube
Containers & Orchestration: Docker, Kubernetes (k3s), Harbor, Proxmox VE
Cloud & Hosting: Oracle Cloud Infrastructure, Azure, Vercel, Supabase
Monitoring & Observability: Prometheus, Grafana
Security: IDS/IPS, SELinux, firewalld, OWASP, CVSS, web and API penetration testing
Development: Python, FastAPI, Node.js, React, Next.js, TypeScript, Spring Boot, Bash
Data & Messaging: PostgreSQL, MongoDB, Apache Kafka

PROFESSIONAL EXPERIENCE

DevOps & Full-Stack Intern — BMCE, Casablanca — Mar 2026 – Aug 2026

- Developed an IPO (OPV) request management platform built on Spring Boot microservices, a React web portal and a mobile application.
- Implemented a Jenkins CI/CD chain with Nexus, Harbor and SonarQube, deploying each service to Kubernetes (k3s).
- Configured development and staging environments, Prometheus/Grafana monitoring and industrialized application rollouts.

DevOps & Security Intern — ITPay, Casablanca — Aug 2025 – Sep 2025

- Turned a Proxmox lab into production multi-cluster infrastructure using Rancher and HAProxy.
- Automated 90% of AlmaLinux provisioning with Ansible (dynamic inventories, idempotent roles).
- Secured the container supply chain (signed Harbor images, SELinux, firewalld) and delivered CI/CD runbooks.

Penetration Tester Intern — CIH Bank, Casablanca — Aug 2024

- Performed web and API penetration tests and prioritized CVSS-scored risks across six digital banking journeys.
- Co-led secure code reviews and presented technical remediation to development teams.

Cybersecurity Analyst Intern — HPS, Casablanca — Jun 2023 – Jul 2023

- Monitored SOC activity (IDS/IPS, network logs) and tuned fifteen critical detection rules.
- Contributed to incident response plans and validated remediations on payment environments.

PROJECTS

Final-Year Project (PFE) — BMCE OPV Subscription Platform 2026
Banking platform for IPO subscription: Spring Boot microservices with Eureka service discovery and Kafka messaging, an internal React portal, a client mobile application, Keycloak authentication with role-based access and audit trails, on PostgreSQL and Docker.

7arka Skate Shop — E-commerce Platform (in production) 2026
Bilingual (EN/FR) online skate shop serving real customers: product catalogue, cart, order workflow with references, statuses and promo codes, plus a staff back office for products, orders and editorial content. Built with Next.js, Payload CMS and PostgreSQL, with a Three.js board configurator, deployed on Vercel.

DevSecAudit — Website Security Audit Platform 2026
Scans a domain through around twenty checks (security headers, TLS, DNS and e-mail records, exposed files, open ports, lookalike domains), returning a 0–100 risk score with plain-language remediation. Python, FastAPI, Celery, Playwright and a Next.js dashboard.

EDUCATION

Engineering Degree, Computer Science & Networks — EMSI, Casablanca 2026
Specialized Technician Diploma, Cybersecurity — ISTA 2022

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified DevOps Professional — Oracle University (2025)
Introduction to Containers with Docker, Kubernetes & OpenShift — Coursera
Virtual Networks in Azure — Coursera | Ethical Hacking Essentials — Coursera | Cybersecurity Tools & Cyber Attacks — Coursera
