Phone: 0679035810 **Email:** sohaibmokhliss@gmail.com

LinkedIn: linkedin.com/in/sohaib-mokhliss

Portfolio: sohaibmokhliss.github.io

GitHub: github.com/sohaibmokhliss

TECHNICAL STACK

CI/CD: GitHub Actions, Ansible pipelines, Rancher.

Containers: Docker, Kubernetes, Rancher, Harbor.

Cloud: Oracle Cloud Infrastructure, Azure, Proxmox VE.

Security: IDS/IPS, SELinux, firewall, web/API pentesting.

Scripting: Bash, Python, JavaScript, Node.js.

KEY SKILLS

- Infrastructure as Code, automation and observability.
- Linux hardening and incident response.
- OWASP audits, CVSS scoring, secure code reviews.

CERTIFICATIONS

- **OCI DevOps Professional (2025)**
Oracle University.
- **Intro Containers (Docker, Kubernetes, OpenShift)**
Coursera.
- **Virtual Networks in Azure**
Coursera.
- **Ethical Hacking Essentials**
Coursera.
- **Cybersecurity Tools & Cyber Attacks**
Coursera.

EDUCATION

EMSI — Computer Science & Networks Engineering, 5th year.

ISTA — Specialized Technician Diploma in Cybersecurity.

LANGUAGES

- **French:** Fluent.
- **English:** Fluent.
- **Arabic:** Native.

PROFILE

5th-year Computer Science & Networks Engineering student at EMSI, specialized in Cybersecurity/DevOps, with banking-sector experience at BMCE, CIH and HPS. Coming from a pentesting background, I combine security discipline, DevOps automation and business understanding to design reliable platforms, industrialize deployments and improve service observability.

EXPERIENCE

DevOps & Full-Stack Intern — BMCE

Mar–Aug 2026

- Developed an IPO request management platform built around Spring Boot microservices, React and a mobile application.
- Implemented a Jenkins CI/CD chain with Nexus, Harbor, SonarQube and per-service Kubernetes k3s deployments.
- Configured dev/recette environments, Prometheus/Grafana monitoring and industrialized application rollouts.

DevOps & Security Intern — ITPay

Aug–Sep 2025

- Turned the Proxmox lab into production multi-cluster Rancher + HAProxy infrastructure.
- Automated 90% of AlmaLinux provisioning with Ansible (dynamic inventories, idempotent roles).
- Secured the container supply chain (signed Harbor images, SELinux, firewall) and delivered CI/CD runbooks.

Penetration Tester Intern — CIH

Aug 2024

- Performed web/API penetration tests and prioritized CVSS risks across six digital banking journeys.
- Co-led secure code reviews and technical remediation presentations.

Cybersecurity Analyst Intern — HPS

Jun–Jul 2023

- Monitored SOC activity (IDS/IPS, network logs) and tuned fifteen critical detection rules.
- Contributed to incident response plans and validated remediations on payment environments.

SELECTED PROJECTS

Terminal Portfolio — Personal (2025)

sohaibmokhliss.github.io

Vanilla JS · strict CSP · Vite · Terminal mode

Dual-mode portfolio with a virtual file system, autocompletion and reproducible build.

Todo Planner — Personal (2025)

github.com/sohaibmokhliss/todo-planner

MERN · JWT · Notifications · Tailwind

Full-stack application with JWT authentication, smart scheduling and notifications.
