Portfolio: https://sohaibmokhliss.github.io

PROFESSIONAL SUMMARY

Computer Science & Networks Engineer (EMSI, 2026) and Specialized Technician in Cybersecurity (ISTA, 2022), with banking-sector experience at BMCE, CIH and HPS. I moved from penetration testing into DevOps, and build platforms that are automated, observable and secure by default. Available immediately for a pre-hire internship or a full-time position.

TECHNICAL SKILLS

CI/CD & Automation: Jenkins, GitHub Actions, Ansible, Nexus, SonarQube, Rancher

Containers & Cloud: Docker, Kubernetes (k3s), Harbor, Proxmox VE, Oracle Cloud Infrastructure, Azure, Vercel

Monitoring: Prometheus, Grafana

Security: IDS/IPS, SELinux, firewalld, OWASP, CVSS, web and API penetration testing

Development: Python, FastAPI, Node.js, React, Next.js, TypeScript, Spring Boot, Bash, PostgreSQL, Kafka

PROFESSIONAL EXPERIENCE

DevOps & Full-Stack Intern — BMCE, Casablanca — Mar 2026 – Aug 2026 (5 months)

- Built an IPO (OPV) subscription platform on Spring Boot microservices, a React portal and a mobile app.
- Set up a Jenkins CI/CD chain with Nexus, Harbor and SonarQube, deploying each service to Kubernetes (k3s).
- Configured development and staging environments with Prometheus/Grafana monitoring.

DevOps & Security Intern — ITPay, Casablanca — Aug 2025 – Sep 2025 (2 months)

- Turned a Proxmox lab into production multi-cluster infrastructure with Rancher and HAProxy.
- Automated 90% of AlmaLinux provisioning with Ansible (dynamic inventories, idempotent roles).
- Secured the container supply chain (signed Harbor images, SELinux, firewalld) and wrote CI/CD runbooks.

Penetration Tester Intern — CIH Bank, Casablanca — Aug 2024 (1 month)

- Ran web and API penetration tests, prioritizing CVSS-scored risks across six digital banking journeys.
- Co-led secure code reviews and presented remediation to development teams.

Cybersecurity Analyst Intern — HPS, Casablanca — Jun 2023 – Jul 2023 (2 months)

- Monitored SOC activity (IDS/IPS, network logs) and tuned fifteen critical detection rules.
- Contributed to incident response plans and validated remediations on payment environments.

PROJECTS

Final-Year Project (PFE) — BMCE OPV Subscription Platform 2026

Spring Boot microservices with Eureka and Kafka, a React portal and a client mobile app, with Keycloak role-based access and audit trails on PostgreSQL and Docker.

7arka Skate Shop — E-commerce Platform (in production) 2026

Live bilingual skate shop serving real customers: catalogue, cart, orders with references and promo codes, and a staff back office. Next.js, Payload CMS, PostgreSQL and a Three.js board configurator, on Vercel.

DevSecAudit — Website Security Audit Platform 2026

Around twenty checks (security headers, TLS, DNS and e-mail records, exposed files, open ports, lookalike domains) scored 0–100 with plain-language fixes. Python, FastAPI, Celery and a Next.js dashboard.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified DevOps Professional — Oracle University (2025)

Coursera: Containers (Docker, Kubernetes, OpenShift) | Virtual Networks in Azure

Coursera: Ethical Hacking Essentials | Cybersecurity Tools & Cyber Attacks
